Cat No: 50191322

UPC No: 783310191322

Description

- Cut through steel, tin, aluminum, fiberglass, wood and plastic
- Deep 1-5/8" (41.3 mm) cutting depth allows for cutting through 2"x4" wood studs
- Extra-tough bi-metal blade- we use the highest grade of tool steel to outlast competitor's blades. That beats premature saw replacement and saves you money
- Steam oxide finish - no paint to gum up and slow cutting. The saw runs cooler for longer life and better performance
- Extra-thick backplate minimizes vibration for smoother, easier, less tiring cutting
- Made in USA

Specifications

- Cutting Size : 1-5/8 IN
- Hole Diameter : 5/8 IN
- Material : Bi-Metal
- Pipe Tap Size : 1/4 IN
- Type : Variable Pitch
- Use With Quick Change Arbor No. : 02800
- Use With Standard Arbor No. : 37157, 37155 or 38522
