

SURECRIMP® ASN SLEEVE

- Manufactured from high strength aluminum alloy which offers maximum conductivity and excellent crimping characteristics.
- Electro-Tin plated for low contact resistance.
- Chamfered entry for easy conductor insertion.
- Color coded end cap identifies the proper compression die.
- Roll marked barrel for easy identification and proper location of crimps.
- Pre-filled with DE-OX prevents oxide from forming.
- Dual rated for Aluminum or Copper conductors.
- UL 486A/B 90° C Listed and CSA Certified.
- If proper high voltage spacing and insulation techniques are used, may be used for high voltage applications up to 35KV.
- Expanded wire size applicable when installed with specified dieless tools.
- UL File E6207
