

Leviton Load Center Thermal Magnetic Branch Circuit Breakers

APPLICATION

The most advanced circuit breakers on the market are also the fastest to install. Only Leviton circuit breakers feature an all plug on design, so you can wire the entire panel at rough-in, without a single circuit breaker present. Intuitive diagnostics such as LEDs on electronic circuit breakers indicate fault type and color indicators in each rocker handle display operational status at-a-glance.

FEATURES AND BENEFITS

- **Simple:** Features an all plug-on installation - no wiring to circuit breakers less than 60A
- **Intuitive:** Line-side powered LEDs stay lit, even after a circuit breaker has tripped, and identify cause of trip: Arc Fault (series or parallel), or Ground Fault. Color indicators in each rocker handle designate operational status at-a-glance (ON/OFF/Tripped)
- **Approachable:** Contemporary aesthetic and rocker style handle are more user friendly
