

YOUR PARTNER FOR WIRE SOLUTIONS

A photograph of a man with a beard and glasses, wearing a dark blue polo shirt with a 'State Electric Supply' name tag, working in a factory. He is wearing safety goggles and a headband, and is focused on a task involving a large spool of wire. The background is blurred, showing industrial equipment and more wire spools.

State Electric's Wire Solutions are designed to provide you with customized wire solutions, advanced jobsite support, and equipment that dramatically improves installation speed and accuracy. Helping you manage tight timelines, high labor costs, and complex installation requirements.

From color feeders and paralleled reels to A-frame deployment and pre-installed pulling heads, our services help reduce downtime, minimize labor strain, and keep projects on schedule.

WIRE SOLUTIONS THAT MAKE A DIFFERENCE

■ **Save Time on Every Pull**

Custom cuts, paralleling, and pre-installed pulling heads eliminate on site prep and let crews start work immediately.

■ **Reduce Labor Costs**

Fewer manual steps, less time, and lower installation costs.

■ **Increase Jobsite Safety**

Organized reels and proper pulling equipment reduce hazards and prevent unsafe setups.

■ **Improve Accuracy**

Color feeders, labeling, and bundling reduce errors and support clean, code-compliant installs.

■ **Reduce Waste**

Prepped wire minimizes miscuts, damage, and scrap.

■ **Stay on Schedule**

With less onsite prep and fewer delays, crews move efficiently from one project phase to the next.

Our online customer portal gives you 24/7 access to quick ordering, quotes, pricing, order tracking, and proof of delivery
SAVE YOU TIME, STAY INFORMED, AND KEEP YOUR PROJECTS MOVING

OUR SOLUTIONS DELIVER PRECISION, SPEED, AND COST-SAVING ADVANTAGES

COLOR FEEDERS

Color wire eliminate confusion and reduces the chance of mislabeled wire, enabling crews to install feeder sets faster and with fewer mistakes.

A-FRAMES & JOBSITE SETUP

State Electric provides A-frames for stable wire handling, along with jobsite setup assistance. A-frames are also available for rental to support large pulls and ongoing project needs.

PARALLELING

Pre-paralleled wire speeds up installation, minimizes onsite handling, and allows multiple conductors to be pulled simultaneously—reducing labor hours dramatically.

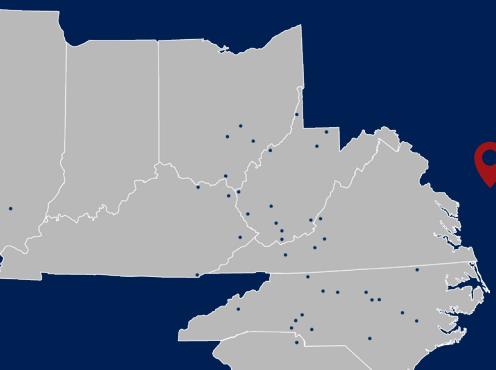

PULLING HEADS INSTALLED

Pre-installed pulling heads mean your team can begin pulling wire immediately upon delivery.

MORE WAYS TO SUPPORT YOUR WIRE NEEDS

- **Field Services:** Flatbed Delivery, Wire Pulling Accessories, & Jobsite Setups
- Custom Bundling, Labeling, & Kitting
- On-site Parallel & Wire Cuts

- Competitive Pricing Support
- Training Opportunities for your Team
- Specialized Quoting & Logistics Coordination
